

A uniquely designed variceal band ligation system, enabling easy set up and to perform band ligation under unrestricted vision. Used for treatment of esophageal varices above the GE junction the system incorporates automatic alerts for band release and count of unused bands.

GRIPP
NOVA
Variceal Ligation System

Variceal Ligation System

6 latex rubber bands in black color helps easy visualization

excellent 100% vision ensures total viewing

Minimum release force required for band causing least compression of the endoscope

in situ count of unreleased bands facilitates proper planning

Special handle adapters keeps the handle secure and firm

Convenient irrigation port for flushing blood or any fluids which obstruct vision

Single suture release keeps the lumen of the channel free for the varix and vision

Catheter loaded trip cord ensures insertion of trip cord in one pass
