

VGRIPP
NOVA
Variceal Ligation System

 **INDUS
MEDICAL
INSTRUMENTS
PRIVATE LIMITED**
An ISO 9001-2008 Company

A uniquely designed variceal band ligation system, enabling easy set up and to perform band ligation under unrestricted vision. Used for treatment of esophageal varices above the GE junction the system incorporates automatic alerts for band release and count of unused bands.

VGRIPP
NOVA
 Variceal Ligation System

- 6 Latex rubber bands in black colour
helps easy visualization
- Excellent 100% vision
ensure total viewing
- Minimum release force required for band
causing least compression of the endoscope
- In situ count of unreleased bands
facilitates proper planing
- Special handle adapters
keeps the handle secure and firm
- Convenient irrigation port for flushing
blood or any fluids which obstruct vision
- Single suture release
keeps the lumen of the channel free for the varix and vision
- ensures insertion of trip cord in one pass**
